\_\_\_\_\_ IS IN \_\_\_\_\_

You won't believe what we found when we were planting a vegetable garden in our Granddaddy's back yard!! We were stunned, amazed, shocked, excited and what an adventure! Oh... excuse me, I'm getting a little ahead of myself here. My name is Bryan and I have a younger sister named, Lindsay.

It all started when we went to visit at our Granddaddy's house at the beach. It was the beginning of summer. Our visit started with doing regular stuff, you know - talking, eating watermelon, having our annual watermelon seed spitting contest, a trip to the beach with some fishing until that one afternoon.

On this particular afternoon we decided to surprise Granddaddy by helping dig his vegetable garden. As we were in the back yard digging, my shovel came across something that looked like an old bottle. But not just an ordinary bottle – this bottle had paper rolled up inside! We gently pulled out the torn pieces of paper. It looked like some kind of Treasure MAP. We unrolled each of the pieces and began putting them together. Lindsay ran and got some tape.

When the pieces were finally together we both agreed that it was indeed some kind of Treasure MAP although it had some missing information in the MAP KEY.

We ran straight to our granddaddy for him to take a look at what we had found. Granddaddy said, "Wow, this does look like the real deal – a real treasure map. Through the years I have heard many stories passed down about how the nearby island off shore held great treasures. Many people had been to the island before but without a MAP and a KEY to understand, the treasure remained a mystery."
